

i-NETT Fortify AI

Make every employee an AI expert. Securely.

HIPAA

GDPR

CCPA

SOC 2 (IN PROCESS)

ISO 42001

NIST-ALIGNED

FOR THE CEO AND THE CFO

Every top AI model. One secure login. One bill.

AI only pays off when your team actually uses it. Fortify AI is built adoption-first — so the productivity you pay for actually shows up, without asking you to pick one model, watch your data, or forecast a bill you can't predict.

Every team gets the model it wants — **without picking one**

- The leading model from every major provider, one secure login
- Access set by policy — no one opening personal accounts to get the model they need

Nothing you touch ever leaves. **Nothing trains a model.**

- Zero data retention configured across every model
- Your data never trains anyone's model — one compliance answer, for every model

Real workflows and agents — **built with you, or by us**

- Repetitive work on autopilot — invoices, follow-ups, reporting, data entry between systems
- Skip the long AI project — built with your team or ours, tuned for accuracy, security, and cost, human in the loop

One number your CFO can **actually forecast**

- All-in per user — models, governance, coaching, automation, and support in one figure
- Priced below a single premium AI seat — no surprise consumption bills, no extra tools or hires

i-NETT Fortify AI

The return, the risk, and the number you can defend

LLOYD'S-INSURED DEPLOYMENT

ZERO DATA RETENTION

THE CEO

Grow faster than the competition

The risk is an AI rollout that stalls and leaves you looking slow while competitors pull ahead. **Fortify AI is adoption-first** — your whole team uses it, so the edge is real movement on the work that drives the business.

THE CFO

Returns you can defend, risk you can see

The risk is paying per seat for tools no one opens, plus compliance gaps you can't quantify. **Fortify AI is all-in per user** — governed, insured, with a productivity number you can take to the board.

THE REAL BLOCKER ISN'T THE MODEL — IT'S PEOPLE

This isn't an AI tool. It's an AI partner.

Adoption is where AI stalls. Fortify AI is built to move your whole team — so the capability you pay for actually gets used. That's the difference between software you bought and a partner that changes how your people work.

PROMPT COACH

A coach in the flow of daily work. Each person gets faster and more valuable, so they lean in. Job security goes up, not down.

WORKFLOW

Shared workflow skills mean one person's win becomes everyone's. When a teammate trains an automation, the whole team can run it.

AGENTS

Our team builds your agents alongside your people, so the tools fit how the work actually happens — and reach production fast.

ESTIMATED ANNUAL PRODUCTIVITY OPPORTUNITY

\$812,500

A 50-person firm · 5 hrs saved per employee / week · \$65 fully-loaded hourly cost.

Per week	Per month
\$16,250	\$70,363

The upside when your whole team actually uses AI — not just a few power users.

Illustrative, not a forecast. Employees × \$65/hr × 5 hrs/wk × 50 wks. Anchored to U.S. BLS, May 2024 (research cites 4–8 hrs/wk).

PER USER / MONTH — WHAT A COMPARABLE SEAT COSTS

Perplexity Enterprise Max

Progress bar (approx. 10% full) \$325

Claude Team, premium seat

Progress bar (approx. 30% full) \$125

Fortify AI — all-in, managed

Progress bar (approx. 25% full) \$75

Those two are single-model seats. Fortify AI is one all-in price for every top model, governance, prompt coaching, shared workflow skills, and automation — plus one free agent for every 25 employees. Volume and current-client discounts available.

Start with a complimentary AI Risk & Shadow AI

Assessment. In 30 minutes we map every unapproved AI tool in use across your organization, name your top three exposures, and hand you a one-page action plan you keep either way.
